## Smart Motion Sensor

MindoLife's Smart Motion Sensor is a motion monitoring device which can be placed at any location in the house. It enables a secured remote motion sensing in a room over the air and via the internet thus providing information which can be used for smart scenarios. Putting the house in "away" mode if no motion is detected for some time (nobody is at home), alerting the user on movement/no-movement detection and countless more configurable smart scenarios to suit one's habits and specific needs. It is Easy to install, long lasting battery powered and does not require any changes to the home electric grid

**Item number:** #MMS310v3.2  
**RF Standard:** IEEE 802.15.4  
**Voltage:** 3.0v  
**Power source:** 2 AAA 1.5v batteries  
**Max. Current:** 30ma  
**Encryption:** AEC-CCM  
**Security:** MindoLife smart home security protocol

MindoLife smart home sensors are Low power devices working with standard AA batteries.

MindoLife low power protocol decrease power consumptions and enable a long batteries life with no need to replace.

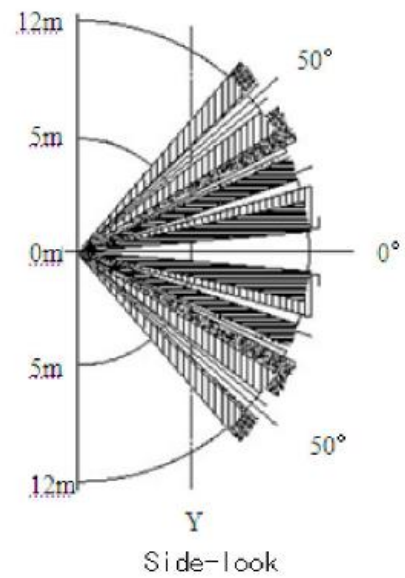

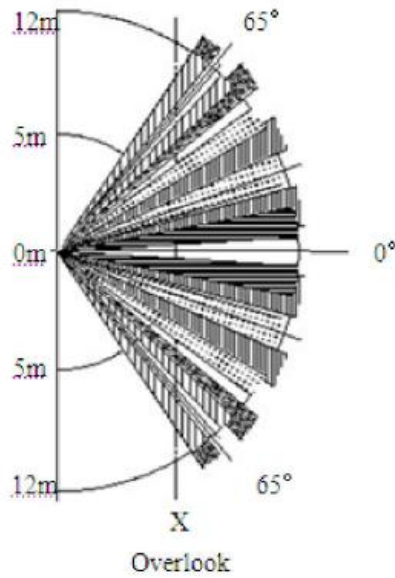

**Installation steps:**

- Choose a proper monitoring point to place the sensor
- Motion sensors work best when they can cover the widest possible area. it's best to place them where they have an unobstructed view of the room.

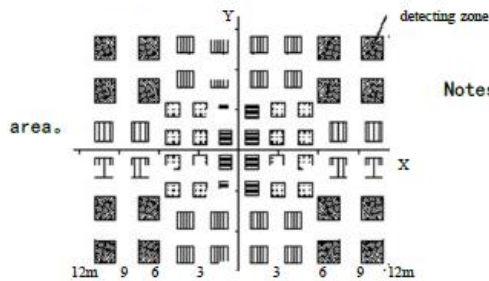

**The Least Effective Placement**

- Directly Across a Window
- Near a Heat Source
- Directly Across From a Door

## View of field

## X-Y sectional view

Notes: 1. X-Y sectional view represent the detecting

2. Objects with temperature difference can be Detected in the vertical level.
